research & development

Custom Designed Products

Our seasoned team of engineers is dedicated to the innovation of specialized meters and metering components. Their extensive knowledgebase combined with the drive to resolve customer difficulties, allows our engineering team to develop innovative new products that meet our high standards, as well as customers' stringent requirements.

For every turbine flow meter manufactured by Turbines, Inc., a unique K-factor is documented by means of NIST-traceable factory, independent laboratory, or bench calibration processes.

Support and Service

Our full-time, dedicated service group offers 100% trustworthy support and recertification for flow meters – whether our own or a competitor's brand. Our meter proving services are performed by our trained technicians and the latest testing equipment, and provide significant benefits, such as:

- In-house oxygen cleaning
- Factory electronic rehabilitation and rebuilding
- Custom-developed meters for specialized requirements

Inventory

Our vast in-stock inventory and expedient delivery capabilities are due to the investment in cutting-edge manufacturing, and our network of dedicated facilities and partners. Our products are always in stock and ready for immediate shipment, typically within 24 hours.

Certifications

Turbines, Inc.'s quality management systems are ISO 9001 and AS 9100 compliant and Canadian CRN certified.

Worldwide Support

Turbines, Inc. is a subsidiary of Primary Flow Signal, Inc. We serve customers worldwide with U.S. offices in Cranston, RI (headquarters); Houston and Odessa-Midland, TX; Altus, OK; Seneca, SC; as well as locations in Edmonton, Alberta, Canada; United Arab Emirates.

Contact your Turbines, Inc. Field Application Engineer for assistance.

Turbines, Inc. products and operations are certified to industry standards for safety and performance. Visit our web site for details.

All Turbines, Inc. products are proudly made in the U.S.A.

the leader in turbine flow metering solutions

Flow metering accuracy is mission-critical for oil and gas, low temperature, and high pressure applications. While many metering technologies claim to be the best, Turbines, Inc. turbine flow meters are field-proven to deliver performance in volatile environments with unmatched reliability, greater efficiency, and higher value.

Quick Change Meters

High Pressure Meters

Slim Line Turbine Flow Meters

Retrofit Kits

We offer cost-effective retrofit replacement kits that are easily installed to avoid time consuming delays with meter replacements. Our retrofit kits enable quick, effortless replacement of meter internals, and fit into the bodies of most competitors' turbine flow meters.

Gas or Cryogenic Turbine Retrofit Kits

Wafer Style Turbine Retrofit Kits

Slurry Turbine Retrofit Kits

Cryogenic Monitors

turbine flow meters

Liquid Flow Measurement

Our in-line and wafer-style liquid turbine meters are rugged, stainless steel, and precision machined. Standard offerings are built using CD4MCu and/or 17-4/416 stainless steel rotors, and feature in-line sizes from 3/8" through 12". Custom configurations and materials are available for high-pressure applications up to 15,000 psig. Turbines, Inc. liquid meters deliver accurate measurements in a wide variety of liquid applications.

Turbine Flow Monitors

Wafer Style Turbine Flow Meters

Gas Flow Measurement

Our durable gas turbine flow meters deliver accurate measurement while withstanding rugged conditions and sustaining a long service life. Our gas turbine meters can handle high working pressures up to 15,000 psig (with high pressure models) and deliver +/- 1.0% standard accuracy over the flow range. Turbines, Inc. gas flow meters provide accurate measurements in a variety of gas applications, such as, natural gas, propane, methane, and CO₂.

Gas Flow Monitors

In-Line Turbine Flow Meters

Cryogenic Flow Measurement

Our cryogenic flow meters, monitors, and accessories are built specifically for high pressure, low temperature applications. These meters feature the same advanced technology, reliability, and accuracy of our liquid and gas measurement products, and are CTEP and NTEP certified. Turbines, Inc. cryogenic meters meet the demands of world's leading liquefied gas producers and distributors by providing unmatched quality, reliability, and accuracy.
