1. Purpose and Basic Description

This is the most basic global template for structured documents in a landscape layout with title block for identification and classification. It is compliant with the ABB group standards 9ADA13 and 9ADA354.

The template features an extensive collection of custom styles according ABB's branding, with logo, titles, numbered headings, etc. ABB's custom styles have an "_" prefix and shall be used as much as possible.

Usage:

- Use the template as base for any structured and controlled document like instructions, standards, requirement specifications, design descriptions, test reports, etc.

(There is a basic implementation of Content Controls for updating attributes on the document. It ensures that information displayed on several pages only needs to be added once.)

- For template responsible persons to use as base when creating local templates, adjusted to business needs:
 - The template must be adjusted e.g. to achieve metadata synchronization between documents and a document management application.

NOTE – Delete this section once done!

2. Example Structure

NOTE – Delete this section once done!

2.1. Heading 2

Text.

- Bullet level 1
 - Bullet level 2
 - Bullet level 2
- Bullet level 3
